

Notice to Suppliers

Rolls-Royce Submarines Standards: Now Available via Egress

Originator: Neal Coles
Job Title: Supply Chain Quality Manager
Business Unit: Submarines Supply Chain

NTS Number: NTS 640
Issue: 1
Date: November 2025

For the attention of quality and technical leaders

Scope/Applicability:

Rolls-Royce Submarines suppliers

Dear Supply Partner,

Introduction:

As of 10 November 2025, Rolls-Royce Submarines Standards are now available to our first-tier suppliers via Egress which replaces our current ForumPass solution.

All content that is currently available in ForumPass is now available to view and download from Egress. The Egress library will be maintained 'live' so as soon as a standard is released (or revised) it will be available in Egress.

Standards content will be available in ForumPass until the end of the year but will not be maintained now that Egress is live. ForumPass content will be removed at the start of January 2026. If suppliers continue to need access to ForumPass while Egress accounts are set up, please use the following link: <https://ui.portal.exostar.com/iamui/mfa/userReference>

Action Required:

Existing ForumPass users that already have Egress accounts have already been admitted to the 'Rolls-Royce Standards' zone and will have view and download permissions. If you fall into this category then you will have received an automated email from Egress notifying you that you have been added to the zone.

If you need to check who in your company has access to the Rolls-Royce Standards zone, please check with your Submarines Supplier Management Team.

If you do not currently have access and require it, then please consult the joining instructions that are available on the Submarines area of the Global Supplier Portal.

Each first-tier supplier will initially be permitted up to four admissions to the Rolls-Royce Standards zone. Sub-tier suppliers will not be permitted Egress accounts. First-tier suppliers should continue to flow down Rolls-Royce requirements per GS3001 and IAW all controls in relation to Security, Export Control and Need to Know.

When a Standard is updated you will now receive an automated email notification from Egress notifying you of the update so there is no need to continually check Egress for changes unless that forms part of your normal company process.

Please note that due to the way Egress content management works, Rolls-Royce will re-upload all material once per month (on or around the first Friday of every month). This means that users will receive an automated email notification from Egress at this time stating that all content has been updated. Please disregard this email.

If you experience any problems with Egress then please contact Subs.Egress@Rolls-Royce.com

If you have specific questions on the Standards then please contact Raynesway.Standardsoffice@Rolls-Royce.com
