

# Notice to Suppliers

## Conflict Minerals Due Diligence Campaign

**Originator:** Alan Seed

**Job Title:** Head of Sustainable Procurement

**Business Unit:** Procurement Excellence

**NTS Number:** NTS 643

**Issue:** 1

**Date:** January 2026

*For the attention of Managing Directors / Senior Sustainability Managers/ Senior HS&E Managers*

**Scope/Applicability:** all suppliers of products containing Tantalum, Tin, Tungsten or Gold

**Dear Supplier Partner,**

Rolls-Royce is committed to the responsible sourcing of materials and sets a requirement that all products are sourced responsibly and verified as 'conflict free'. Our due diligence includes an annual campaign to understand the source and downstream custody of tantalum, tin, tungsten, and gold. The data gathered from this activity is essential to ensuring that our supply chain does not directly or indirectly support armed conflict, human rights abuses or environmental harm.

Rolls-Royce has partnered with Assent to collect conflict minerals data from our suppliers. If you are in scope of this activity, you will have received an e-mail request for information from '[compliancesupport@rollsroyce.dataportal.io](mailto:compliancesupport@rollsroyce.dataportal.io)'. Your active support is requested to ensure this request is recognised and appropriately actioned.

### Action Required:

1. If you have already responded to Assent with a completed Conflict Minerals Reporting Template (CMRT), for 2025, please accept our thanks for your support.
2. If you have not yet responded to Assent, please do so by following the instructions contained in the Assent e-mail request. Your prompt attention is requested to support timely cascade of data to our customers, in advance of regulatory disclosure deadlines. Please ensure that your company CMRT is submitted no later than 31st March 2026.
