

Notice to Suppliers

2027 Procurement Information Booklet

Originator: Colleen Lowry
Job Title: PDL
Business Unit: Defence

NTS Number: NTS 660
Issue: 1
Date: October 2026

For the attention of Managing Directors

Scope/Applicability:

This is applicable to all Aerospace suppliers except for Indirect Civil suppliers.

Dear Supply Partner,

Introduction:

The purpose of this communication is to inform all suppliers of the requirement to complete and maintain the 2027 Procurement Information Booklet (PIB) survey in Ivalua. The PIB is a global, cross-business requirement used to collect supplier information supporting legal and regulatory compliance, Rolls-Royce policies, and effective supplier governance.

There is no participation or registration cost.

All Rolls-Royce suppliers are required to complete and maintain the generic PIB sections applicable across our global businesses. These sections provide essential company, contact, compliance, risk, quality, security, sustainability, export control, customs, and supply-chain information. Suppliers must review the information annually and notify Rolls-Royce promptly of any material change during the year.

Additional questions and representations apply where a supplier supports US Government contracts or subcontracts. These US Government-specific requirements are supplementary to the global PIB sections and will be presented to relevant suppliers based on their business activity.

The PIB is therefore not limited to US Government contracting. Its global, cross-business content includes key supplier information in areas such as:

- Cyber Security,
- Artificial Intelligence,
- Supplier Quality Management
- Diversity, Equity, Inclusion (DEI)
- Sustainability
- Export Control
- Customs
- Covered Telecommunications Equipment and Services

The 2027 PIB will be available in Ivalua from 2 November 2026. All suppliers must complete the applicable global sections. Suppliers supporting US Government contracts or subcontracts must also complete the relevant US Government representations and certifications before contracts, subcontracts, or purchase orders are placed or committed for 2027.

We appreciate your support in maintaining complete and accurate PIB information. Please contact your Rolls-Royce Buyer if you have any questions about the sections applicable to your organisation.

Action Required:

All Rolls-Royce suppliers must complete and submit the applicable 2027 PIB sections in Ivalua from 2 November 2026. Suppliers supporting US Government contracts or subcontracts must also complete the additional US Government-specific requirements.
